WHAT DOES BHAGAVADGITA SAY ON THIS SUBJECT?

महर्षयः सप्त पूर्वे चत्वारो मनवस्तथा ।

मद्भावा मानसा जाता येषां लोक इमाः प्रजाः ॥ १०-६ ॥

Bhagavadgita: Chapter 10, Verse 6

Meaning:

*The seven great Sages, the four great Saints before them,
and the fourteen Manus, are all born from my mind.
From them, all the people in the world have descended.*

P

B

H

M

GENEOLOGICAL DESCRIPTION OF THE UNIVERSE PER VEDAS & UPANISHADS

Brahman (Paramaatman) created Brahma out of His Hiranya Garbha energy. Brahma, in turn, created the Four Kumars or Great Saints simply out of mind.

Brahma later created the Seven Great Sages, also out of mind. Still later, Brahma created 14 Manus. They were empowered with the task of procreation of the human population as well as for the administration of humankind from the celestial abodes.

BRAHMA'S DAY & BRAHMA'S YEAR

Half a Day of Brahma (Day Time Only) = 1 Kalpa =

4.32 Billion Human Years

1 Full Day of Brahma (including Day + Night) =

2 Kalpas = 2×4.32 Billion Human Years =

8.64 Billion Human Years

1 Brahma Year =

$8.64 \text{ Billion} \times 360 \text{ Days} = 3,110,400,000$

(3 Trillion 110 Billion 400 Million Human Years)

P

B

H

M

DEFINITIONS OF MAHAYUGA & KALPA

1 Maha Yuga = Sum Total of 4 Yugas =

$$1,728,000 + 1,296,000 + 864,000 + 432,000 = 4,320,000 =$$

(Satya) + (Treta) + (Dwapara) + (Kali) = 1 Maha Yuga

= 4.32 Million Human Years

1 Kalpa = 1000 Maha Yugas =

4.32 Million \times 1000 =

4.32 Billion Human Years = 1 Day of Brahma

P

B

H

M

BRAHMA'S LIFE & BRAHMA'S AGE

The Life Time of Brahma = 100 Brahma Years

= $100 \times 3,110,400,000 = 311,040,000,000,000$

(311 Trillion, 40 Billion Human Years)

Brahma's Age: Our Current Brahma is 50 Years Old

= $0.5 \times 311,040,000,000,000 =$

155,520,000,000,000

(155 Trillion, 520 Billion Human Years)

DEFINITION OF A MANVANTARA

- ❑ *1 Brahma's Day (or 1 Kalpa) is Ruled by 14 Manus.*
- ❑ *The Duration of Time Ruled by Each Manu is Called a **Manvantara**.*
- ❑ *Therefore, **Each Manvantara** = $1/14^{\text{th}}$ of 1 Kalpa*
= $1/14^{\text{th}}$ of 1000 Maha Yugas
= 71.43 Maha Yugas
*= **308.57 Million Years***
- ❑ *The Name of The **Current Manvantara** = **Vaivaswata***
- ❑ *The Sequence of the **Current Manvantara** = **7th** Out of 14*

OUR RELATIVE POSITION IN HISTORY

- ❑ We are in the 51st Brahma Year of 100 Brahma Years.
- ❑ We are in the 1st Brahma Day of the 51st Brahma Year, which is called the Varaha Kalpa.
- ❑ We are in the 7th Manvantara of Varah Kalpa
- ❑ We are in the 28th Maha Yuga Out of 71 of 7th Manvantara.
- ❑ This Would Place Us @ Approx. 456th Maha Yuga of the 1000 Maha Yugas (Kalpa) That Comprise a Day of Brahma.
- ❑ Within this Maha Yuga, we are in Kali Yuga. The 5100th Year of Kali Yuga corresponds to the year 2,000 A.D. That means that we are fairly early in Kali Yuga (~426,000 Years To Go).

VEDIC PREDICTIONS ABOUT WHAT HAPPENS AFTER COMPLETION OF EACH MANVANTARA AND KALPA?

- ❑ *Each Manvantara (308.5 Million Years) is followed by a Deluge (Great Flood).*
- ❑ *The Deluge destroys the existing continents and swallows up all living beings, except the few who are preserved for the repopulation of the earth.*
- ❑ *After completion of each Kalpa (4.32 Billion Years = Brahma's One Day), Brahma goes to sleep for the duration of another Kalpa.*
- ❑ *During Brahma's Night, there will be absolutely No Life On Earth!*

P

B

H

M

CONSISTENCY BETWEEN VEDIC & SCIENTIFIC PREDICTIONS ABOUT WHEN THE LIFE ON EARTH WILL COME TO AN END

Vedic Predictions:

- ❑ *Since we are currently on the 456th Maha Yuga of 1000 Maha Yugas that comprise a Day of Brahma (Kalpa), we still have another 544 Mahayugas to go before completion of the current Varaha Kalpa.*
- ❑ *Since 1000 Maha Yugas = 1 Kalpa = 4.32 Billion Years,
544 Maha Yugas = $(544/1000) \times 4.32$
= 2.36 Billion Years to go for completion of Varah Kalpa*
- ❑ *Therefore, Life Will Cease to Exist in 2.36 Billion Years.*

P

B

H

M

CONSISTENCY BETWEEN VEDIC & SCIENTIFIC PREDICTIONS ABOUT WHEN THE LIFE ON EARTH WILL COME TO AN END

Scientific Theory & Predictions:

- ❑ *Earth & Sun are each 4.5 Billion Years Old.*
- ❑ *The Life on Earth is totally dependent on Sun, so when the Sun vanishes, so does earth.*
- ❑ *The Sun will start losing energy when the hydrogen fuel in the core of the sun, essential for the fusion process, becomes scarce in about 2.5 - 3 billion years*
- ❑ *The Sun will expand and initially engulf 3 nearest planets, including Mercury, Venus and Earth.*
- ❑ *Therefore, Earth Becomes Uninhabitable in 2.5-3 Billion Years*

P

B

H

M

UNCERTAINTY IN SCIENTIFIC PREDICTIONS WHILE VEDAS FIRMLY DECLARE WHEN THE CURRENT UNIVERSE WILL COME TO AN END

Scientific Predictions:

- ❑ No Answer as to When the Current Universe Will Come to an End. Science simply says that the Universe is continually expanding.

Vedic Predictions:

- ❑ Our Current Brahma is 50 Years Old (155.5 Trillion Human Years)
- ❑ In another 155.5 Trillion Years, after reaching his 100th year of life, Brahma ceases to exist, and so does the current Universe. A new universe and new Brahma will come along.

WHAT DOES BHAGAVADGITA SAY ABOUT HOW BRAHMA'S DAY START AND END?

अव्यक्ताद्व्यक्तयः सर्वाः प्रभवन्त्यहरागमे ।
रात्र्यागमे प्रलीयन्ते तत्रैवाव्यक्तसञ्ज्ञके ॥18॥

-- *Bhagavadgita: Chapter 8, Verse 18*

Translation: At the advent of Brahma's day, all living beings emanate from the unmanifest source. And at the fall of his night, all embodied beings again merge into their unmanifest source.
